AceOne Solutions

Multi-Tenant Meta Lead CRM Platform — Complete Feature Guide

PRODUCTION READY

Version 1.0.0 (Enterprise)

Project Overview & Purpose (آسان الفاظ میں خلاصہ)

AceOne Solutions Multi-Tenant Meta Lead CRM ek mukammal aur centralized SaaS platform hai jo Meta (Facebook aur Instagram) Lead Ads ko live collect kar ke CRM mein organize karta hai. Yeh aam single-company CRM nahi hai, balkay ek **Multi-Tenant SaaS** hai jahan AceOne ka Super Admin multiple client companies ko manage karta hai aur har client ko sirf uske assigned Meta Business Portfolio ka data dikhta hai.

> **Core Architecture (Sab Se Ahem Nukta):**
> AceOne ka **ONE Centralized Meta Developer Account** hai jisme multiple Business Portfolios mojood hain (e.g. Portfolio 1: Azwa Company, Portfolio 2: Apex Company). Har client ke liye alag Meta Developer App banane ki zaroorat nahi hai. Super Admin 1-to-1 mapping ke zariye kisi bhi portfolio ko specific client company ko assign kar deta hai.

1. Platform Architecture & Data Isolation (سیکیورٹی اور آئسولیشن)

- **One Centralized Connection:** Super Admin ek dafa Meta OAuth se central account connect karta hai. System tamam Business Portfolios ko discover kar leta hai.
- **Strict 1-to-1 Portfolio Assignment:** Har client ko sirf ek Business Portfolio assign hota hai. Duplicate assignment system automatically block karta hai taake koi data overlap na ho.
- **OWASP ASVS Multi-Tenant Security:** Database queries backend server-side session cookie se client ka `tenantId` leti hain. Client A kisi bhi soorat Client B ka data, leads ya campaigns nahi dekh sakta.
- **Token Encryption at Rest:** Meta user aur page tokens database mein AES-256-GCM encryption ke sath mehfooz rehte hain.

2. Complete Module & Feature Breakdown (تمام فیچرز کی تفصیل)

ADMIN **Super Admin Master Control**

Platform-wide dashboard jahan total clients, active/inactive companies, connected portfolios, aaj aane wale leads, aur Meta connection health live monitor hoti hai.

ADMIN **Client Companies Management**

Nayi client company create karna, primary Client Admin login credentials banana, status active/inactive toggle karna, password reset aur deletion safeguards.

META **Central Portfolio Management**

Central Meta account ke tamam Business Portfolios ki table, Meta Business ID, Ad Accounts aur Pages ki ginti, aur client assignment/reassignment workflow.

META **Asset Permissions & Health Check**

Page Lead Access diagnostics, webhook subscription check, token validity verification, aur missing permissions ke liye clear resolution guidance.

WEBHOOK **Real-time Meta Lead Ingestion**

GET verification (hub.challenge) aur POST signature verification (X-Hub-Signature-256). Idempotent leadgen_id processing jo duplicate leads rokta hai.

WEBHOOK **Raw Submission Preservation**

Customer ke form responses (Name, Phone, Email, Service) ko normalized format ke sath sath original Graph API JSONB format mein hamesha safe rakhta hai.

3. Client CRM Dashboard Features (کلائنٹ پورٹل کی سہولیات)

CRM **Client Analytics Dashboard**

7 KPI metrics: Total Leads, New, Contacted, Interested, Converted, Lost, Conversion Rate %. Facebook vs Instagram source breakdown chart aur aaj ki follow-up alerts.

CRM **Full Leads Management**

Search (Name, Phone, Email, Lead #), multi-filters (Status, Platform, Campaign, Form), CSV Export, aur slide-over lead detail drawer with internal notes thread.

PIPELINE **Visual Sales Kanban Board**

5 Lifecycle columns: New, Contacted, Interested, Converted, Lost. Interactive drag-and-drop cards aur automated status history transition audit logging.

TASKS **Follow-up Reminder Management**

Har lead ke sath scheduled follow-up call/meeting add karna. Categorized tabs: Today, Upcoming, Overdue, Completed, with 1-click status updates.

INSIGHTS **Campaigns & Ads Hierarchy**

Portfolio → Ad Account → Campaign → Ad Set → Ad → Instant Form hierarchy explorer with real-time lead counts and objective stats.

REPORTS **Platform Reports & Analytics**

Interactive charts for status distribution, source comparisons, campaign ROI comparison, aur 1-click full CSV report downloads.

4. Enterprise White Design System (طرزِ تعمیر اور ڈیزائن)

Platform ko user ke rules ke mutabiq **pure modern white design** par banaya gaya hai (no dark theme, no unnecessary animations):

- **Main Canvas:** White (`#FFFFFF`) with crisp subtle borders (`#E2E8F0`).
- **Secondary Background:** Very light slate (`#F8FAFC`).
- **Primary Text:** Charcoal (`#111827`) and muted grey (`#64748B`).
- **Brand Accent:** Professional Royal Blue (`#2563EB`).
- **Official Branding:** AceOne Solutions brand logo integrated seamlessly on Login, Super Admin, and Client dashboards.

5. Automated Verification & Testing Results (ٹیسٹنگ رپورٹ)

Test Suite	Scope / What Was Tested	Result
Tenant Isolation Suite	Cross-tenant query leakage, direct object reference parameter tampering, and duplicate portfolio assignment block	**3/3 PASSED**
Webhook Pipeline Suite	Hub challenge verification, HMAC-SHA256 signature, Graph API mapping, JSONB storage, and leadgen_id idempotency	**PASSED**
Next.js Production Build	All 26 app routes and 19 API endpoints compiled cleanly with Turbopack and TypeScript	**0 ERRORS**
Live Server & DB Sync	HTTP 200 on login, Super Admin session creation, Client Admin session creation, and PostgreSQL 18 sync	**ACTIVE ON :3000**

6. Default Login Credentials for Testing (ٹیسٹ اکاؤنٹس)

Account Role	Email / Username	Password	Access URL
Super Admin (Master Control)	`admin@aceone.com`	`Password@123`	`http://localhost:3000/admin`
Client Admin (Azwa Real Estate)	`azwa@aceonecrm.com`	`Password@123`	`http://localhost:3000/dashboard`
Client Admin (Apex Logistics)	`apex@aceonecrm.com`	`Password@123`	`http://localhost:3000/dashboard`

7. Production Deployment Readiness (cPanel Deployment)

Production deployment ke liye complete `CPANEL_DEPLOYMENT_GUIDE.md` mojood hai jo cover karta hai:

- cPanel **Setup Node.js App** (Phusion Passenger / PM2 reverse proxy).
- PostgreSQL database connection string setup.
- AES-256 encryption keys aur environment variables configuration.
- cPanel Cron Job reconciliation: `curl -s -X POST https://yourdomain.com/api/cron/sync-leads?key=...`
